

The Cottage

I stayed at this farm for 3 months and I had a great time and learned a lot about horses and other general farm stuff. The farm is placed about an hour train trip south of Melbourne, where you easily can go when you're having a day off.

There are 13 horses to take care of, everything from old horses who we just rode for fun as they still need some exercise, to younger horses that are getting trained for competition, to a young foal who one day will be a big good looking boy.

The work is basic farm duties, horse riding, gardening, driving, mowing etc. The work with the horses is based on how much experience you have with riding and young horses.

The accommodation, showers and toilets are really nice and clean and there are heaps of working clothes, jackets and shoes you can use.

There are also a car you can borrow if you want to go somewhere on your day off or in the evening.

I had a really good time at the Cottage and Chris and Deborah are really nice and they have the loveliest little dog that always gives you a lot of happiness. This is the perfect place for a horse lover who wants to learn more and wants to have a good farm experience in Australia.
